EPA Carcinogen Classifications*

Group A - known human carcinogen

Chromium	Benzene	Asbestos
Vinyl Chloride	Bis(chloromethyl)ether	Nickel

Group B - probable human carcinogen

B_1 - (limited human data)

Diesel exhaust	Formaldehyde	Ethylene Oxide
Cadmium		

B_2 - (sufficient animal and inadequate human data)

Perchloroethylene	Trichloroethylene	1,2-Dichloroethane
Beryllium	Carbon tetrachloride	1,3-Butadiene
Chloroform		

Group C - possible human carcinogen

Para-Dichlorobenzene	Acrolein
1,1-Dichloroethylene	

Group D - not classifiable (inadequate animal and human data)

Phenol

1,1,1-Trichloroethane

Group E - evidence of non-carcinogenicity

Endrin

---

* Based upon the "weight of the evidence" approach in risk assessment; the classification system is based upon EPA Guidelines for Carcinogenicity (1986).
